Bathroom Neatness.

At all seasons of the year is a neat spotless and pleasant bathroom desirable. But especially as warm weather draws near is this so. For most bathrooms are fairly overworked in the summer, when a refreshing sponge or tub bath twice a day is not at all unusual for each member of the family.

Especially if the whole family shares one bathroom is it necessar to have it carefully arranged. The care of a bathroom used only by one

to have it carefully arranged. The care of a bathroom used only by one or two persons is not at all difficult A little daily straightening and clean ing keeps it orderly. But if six persons use the same bathroom, the problem of keeping it always clean, nea and pleasant to look at is more difficult.

To begin with, the bathroom should have washable walls. Painted plaster washable paper or tiles are all desirable. In the next place, the wall. should be washed occasionally—not every week, but often enough to keep them spotless. Those portions of then that get spattered from wash bas or tub should be sponged off every

or tub should be sponged off every day if need be.

The floor, too, should be washable
If it is hard wood, run the risk of
taking off some of the polish by usin clear water, in which a little kerosen;
is poured twice a week to wash it
Tiles or cement are easily washed, and
the policy of clickth so is a good quality of oilcloth on linoleum, which should be used if the floor is not of some easily washed ma-

terial.

There should be a suppoard in the bathroom where cleaning materials can be kept—a brush for the floor cleaning cloths, ammonia and borax for the basin and tub, and the scouring soap. If these materials are all ways near at hand the trouble of cleaning the bathroom is lessened. If there is no cumberd, a pented or an there is no cupobard, a painted or en ameled shelf, with curtain of easily washed muslin in front of it, can be

washed muslin in front of it, can be put up.

There should be a cupboard in the too, for soiled towels, and these should never be put in it wet or damp. The should be dried out of doors or quickly, in winter, on the bathroom radiator, each morning before putting into the laundry receptacle.

A good way to arrange the toweld is to put initials over the various

is to put initials over the various towel racks. These initials can be worked in cross-stitch on a square muslin and buttoned over the racks. or they can be painted on the wall.

The word "guest" over one rack would make it quite clear to the guest in the family bathroom which towels he is supposed to use.

# Aunt Chatty's Mothers' Club Conducted by Mrs. Charity Brush

### TRAINING IN ACCURACY.

"HIS is a real Mothers' Club, for the benefit of mothers everywhere who are struggling with questions of discipline, training, education, clothing, for the children. Write to Aunt Chatty of problems which are vexing you, and she will advise and help you to a solution of Write to her, too, of your own discoveries, of methods you have found successful in smoothing the rough paths of life for the tender, childish feet, that through the Mothers Club your experience may be of benefit to other mothers who are still tangled in the web of perplexity you

Co-operation is the secret of success in any business; so why not in the business of motherhood, that highest and holiest calling which always has been and always will be woman's crown of glory, no matter what other avenues of usefulness may be opened to her? Address Mrs. Charity Brush, care of this paper.

Several letters have reached me of late from mothers in different parts of the country complaining of a lack of accuracy they observe in their children; lack of carefulness in the things they do with their hands, lack of attention to the details of the things they see, lack of entire truthfulness in the statements they make about what they have seen or heard. One letter, from the mother of a son, says:

| Maste for utterance, she draws him close to her side in a loving embrace and cautions him: "Wait now, son, not so fast! Go slowly and tell mother just exactly how it happened."

| She is never too busy to listen to his stories, and when he repeats to her things they have seen or heard one letter, from the mother of quote the words just as he heard them. son, says:

"Dear Aunt Chatty: My husband and "Dear Aunt Chatty: My husband and I are distressed about the way our boy of 14 does things with his hands. He is smart enough at his lessons, and he is a leader in all the boys' games of baseball and football, but when it comes to making things with his hands he is as awkward as anything I ever saw. I tell him he cannot nail two sticks together so they will hold. We notice it so much more because his father, who is now a contractor and builder, started life as a carpenter, and he is unusulife as a carpenter, and he is unusually skilful with his hands. Wouldn't you think his son would have inherited some dexterity? Is it because that kind of skill isn't developed by our modern methods of education? Please write us one of your good letters and tell us what you think about it, as I know other mothers are beginning to be troubled about the same things, and we want to take it up in our little neighborhood Mothers' Circle for one of our club dis-

cussions." It does seem to be a fact that in these days of machinery we have forgotten th old manual dexterity that made creative artists of the artisans of other days. In former times, you remember, nearly every man had a trade. The little "red schoolhouse" furnished only a meager part of his education. Eye and ear and hand were trained to habits of

tion is not education in the real sense of the word. The great authority on educational matters, Dr. Charles W. Ellot, complains of this lack of accuracy in an article on "Changes Needed in American Secondary Education," writ-ten for the general education board. In that article Dr. Ellot said:

"Many an elderly professional man, looking back on his education and examining his own habits of thought and of expression, perceives that his senses were never trained to act with precision: that his habits of thought permit vagueness, obscurity and inaccuracy, and that his spoken or written statement lacks that measured, cautious, candid, simple quality which the scientific spirit fosters and inculcates."

The scientific spirit teaches accuracy of thought and statement, just as manual training compels a dextrous use of the hands, and as physical training develops a correct use of the body. What The man who says a thing or a condition is good enough is likely to be good for nothing.

In life you either get ahead or get a foot—and its usually a "foot" for the man who says "good enough."

Don't pest on your laurels or conditional methods is something that will train the says and bodies and brains, and give to our boys and girls that coordinated use of their nerves and senses the conditional methods in the "guperman" we have we expect in the "superman" we hope

Such training cannot fall to make itself felt in what the boy does as well as in what he thinks, and I recommend a similar course to all the mothers who have begun to feel that their children are not getting the complete development, both physical and mental, that is their due.

### Answers to Correspondents. Mrs. R. F. G. asks: "Do you believe in

telling fairy stories to children?" I have been asked that question many times, but as Mrs. R. F. G. is a new member I will say again that I do most emphatically believe in telling and read-ing fairy stories to children. They need them at a certain stage of development and they will not be completely equipped mentally without them

Thank you, dear little Verna S., for the Thank you, dear little Verna S. for the kind invitation to visit you and your mother and tell you a lot of pretty stories. If I ever come to your part of the country, be sure I will come to see your part of the country. (Copyright, 1916.)

## Record for Whisky Drinking.

Salina, Kan., March 26.—The record for whisky drinking was made in Salina recently when three Mexicans drank twelve

ear and hand were trained to habits of accurate observation and manipulation that were potent for efficiency whether the boy grew up to be a farmer, a hunter, a blacksmith or a carpenter.

We lay so much stress today on what we are pleased to call the "higher education," including so many 'ologies and 'isms in the curriculums of our modern schools that it is all the children can do to make their grades in their book studies and there is no time for that manual training without which education is not education in the real sense the cently when three Mexicans drank twelve quarts in a few minutes.

An officer working in the Mexican district of the town observed a case of twenty-four quarts being carried into a house and rain for help. A squad raided the place in about forty minutes and three men found there were raving drunk and twelve of the bottles had been emptted. The men were arrested. Unless traces of liquor sales are found from this house the police will have to believe them drank the twelve quarts in a few minutes.
